Miniature Gasoline Engine Generator - GP-1
Contract RD-13 with

This document is part of an integrated file. If separated from the file it must be subjected to individual systematic review.

25X1

1. In the interests of expediting completion of the development of our miniature gasoline engine generator, it is recommended that this Agency waive the report required of the contractor at the end of the research period and that he be authorized to proceed into the model stage at any time at his discretion.

2. The Gemo Engineering Branch will review the paper design upon its completion, the Project Engineer visiting the contractor's plant for this purpose so that not only the design but the preliminary research models may be inspected as well. It is believed that this process will not only protect the interests of the Government but will contribute to accelerating the project.
